Respiratory and circulatory systems

P5 · Systems

1. Why does breathing rate increase during exercise?

[2]

- A. Muscles need more oxygen and release more carbon dioxide B. Gravity
C. Evaporation D. A complete circuit

2. Why does breathing rate increase during exercise? Explain your answer clearly.

[2]

3. Why does breathing rate increase during exercise? Explain your answer clearly.

[4]

4. Why does breathing rate increase during exercise?

[2]

- A. Muscles need more oxygen and release more carbon dioxide B. Gravity
C. Evaporation D. A complete circuit

5. Why does breathing rate increase during exercise? Explain your answer clearly.

[2]

6. Why does breathing rate increase during exercise? Explain your answer clearly. [4]

7. Why does breathing rate increase during exercise? [2]

- A. Muscles need more oxygen and release more carbon dioxide B. Gravity
C. Evaporation D. A complete circuit

8. Why does breathing rate increase during exercise? Explain your answer clearly. [2]

Answer Key

Q	Section	Answer	Guidance
1	Respiratory and circulatory systems	A	The body increases gas exchange to support respiration.
2	Respiratory and circulatory systems	Muscles need more oxygen and release more carbon dioxide	The body increases gas exchange to support respiration.
3	Respiratory and circulatory systems	Muscles need more oxygen and release more carbon dioxide	The body increases gas exchange to support respiration.
4	Respiratory and circulatory systems	A	The body increases gas exchange to support respiration.
5	Respiratory and circulatory systems	Muscles need more oxygen and release more carbon dioxide	The body increases gas exchange to support respiration.
6	Respiratory and circulatory systems	Muscles need more oxygen and release more carbon dioxide	The body increases gas exchange to support respiration.
7	Respiratory and circulatory systems	A	The body increases gas exchange to support respiration.
8	Respiratory and circulatory systems	Muscles need more oxygen and release more carbon dioxide	The body increases gas exchange to support respiration.
