Interactions within the environment

P6 · Interactions

1. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number B. Gravity
C. Evaporation D. A complete circuit

2. What may happen to a food web if the number of producers decreases sharply? Explain your answer clearly. [2]

3. What may happen to a food web if the number of producers decreases sharply? Explain your answer clearly. [4]

4. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number B. Gravity
C. Evaporation D. A complete circuit

5. What may happen to a food web if the number of producers decreases sharply? Explain [2]
your answer clearly.

6. What may happen to a food web if the number of producers decreases sharply? Explain [4]
your answer clearly.

7. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number B. Gravity
C. Evaporation D. A complete circuit

8. What may happen to a food web if the number of producers decreases sharply? Explain [2]
your answer clearly.

Answer Key

Q	Section	Answer	Guidance
1	Interactions within the environment	A	Energy enters most food webs through producers.
2	Interactions within the environment	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
3	Interactions within the environment	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
4	Interactions within the environment	A	Energy enters most food webs through producers.
5	Interactions within the environment	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
6	Interactions within the environment	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
7	Interactions within the environment	A	Energy enters most food webs through producers.

Q	Section	Answer	Guidance
8	Interactions within the environment	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
