Ratio

1. The ratio of red beads to blue beads is 4:8. If there are 52 red beads, how many blue beads are there? [1]

- A. 104
C. 103
- B. 105
D. 109

2. The ratio of red beads to blue beads is 6:5. If there are 84 red beads, how many blue beads are there? [2]

3. The ratio of red beads to blue beads is 7:6. If there are 49 red beads, how many blue beads are there? [4]

4. The ratio of red beads to blue beads is 4:8. If there are 64 red beads, how many blue beads are there? [1]

- A. 128
B. 129
C. 127
D. 132

5. The ratio of red beads to blue beads is 7:6. If there are 49 red beads, how many blue beads are there? [2]

6. The ratio of red beads to blue beads is 6:9. If there are 78 red beads, how many blue beads are there? [4]

7. The ratio of red beads to blue beads is 5:3. If there are 65 red beads, how many blue beads are there? [1]

- A. 39 B. 40
C. 38 D. 45

8. The ratio of red beads to blue beads is 6:9. If there are 78 red beads, how many blue beads are there? [2]

Answer Key

Q	Section	Answer	Guidance
1	Ratio	A	104. 1 ratio unit = 13, so blue beads = 8 x 13.
2	Ratio	70	1 ratio unit = 14, so blue beads = 5 x 14.
3	Ratio	42	1 ratio unit = 7, so blue beads = 6 x 7.
4	Ratio	A	128. 1 ratio unit = 16, so blue beads = 8 x 16.
5	Ratio	42	1 ratio unit = 7, so blue beads = 6 x 7.
6	Ratio	117	1 ratio unit = 13, so blue beads = 9 x 13.
7	Ratio	A	39. 1 ratio unit = 13, so blue beads = 3 x 13.
8	Ratio	117	1 ratio unit = 13, so blue beads = 9 x 13.
