

PSLE Science Exam Pack

One written paper: Booklet A and Booklet B. Duration: 1 h 45 min.

Total marks: 100

Science Booklet A and Booklet B format based on SEAB 2026 PSLE Science 0009. Questions are original practice questions, not official PSLE past-paper questions.

Name

Class

Date

Booklet A - Multiple-choice

30 questions, 2 marks each.

1. Name two things a plant needs for photosynthesis.

[2]

A. Light and carbon dioxide

B. Gravity

C. Evaporation

D. A complete circuit

2. A battery-operated fan changes electrical energy mainly into what form?

[2]

A. Kinetic energy

B. Gravity

C. Evaporation

D. A complete circuit

3. A box is harder to push on a rough floor than a smooth floor. Explain why.

[2]

A. There is more friction

B. Gravity

C. Evaporation

D. A complete circuit

4. What may happen to a food web if the number of producers decreases sharply?

[2]

A. Consumers may have less food and decrease in number

B. Gravity

C. Evaporation

D. A complete circuit

5. Name two things a plant needs for photosynthesis. [2]

- | | |
|-----------------------------|-----------------------|
| A. Light and carbon dioxide | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

6. A battery-operated fan changes electrical energy mainly into what form? [2]

- | | |
|-------------------|-----------------------|
| A. Kinetic energy | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

7. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- | | |
|---------------------------|-----------------------|
| A. There is more friction | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

8. What may happen to a food web if the number of producers decreases sharply? [2]

- | | |
|--|-----------------------|
| A. Consumers may have less food and decrease in number | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

9. Name two things a plant needs for photosynthesis. [2]

- | | |
|-----------------------------|-----------------------|
| A. Light and carbon dioxide | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

10. A battery-operated fan changes electrical energy mainly into what form? [2]

- | | |
|-------------------|-----------------------|
| A. Kinetic energy | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

11. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- | | |
|---------------------------|-----------------------|
| A. There is more friction | B. Gravity |
| C. Evaporation | D. A complete circuit |
-
-

12. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number B. Gravity
C. Evaporation D. A complete circuit
-
-

13. Name two things a plant needs for photosynthesis. [2]

- A. Light and carbon dioxide B. Gravity
C. Evaporation D. A complete circuit
-
-

14. A battery-operated fan changes electrical energy mainly into what form? [2]

- A. Kinetic energy B. Gravity
C. Evaporation D. A complete circuit
-
-

15. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- A. There is more friction B. Gravity
C. Evaporation D. A complete circuit
-
-

16. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number B. Gravity
C. Evaporation D. A complete circuit
-
-

17. Name two things a plant needs for photosynthesis. [2]

- A. Light and carbon dioxide B. Gravity
C. Evaporation D. A complete circuit
-
-

18. A battery-operated fan changes electrical energy mainly into what form? [2]

- A. Kinetic energy B. Gravity
C. Evaporation D. A complete circuit
-
-

19. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- A. There is more friction
- B. Gravity
- C. Evaporation
- D. A complete circuit

20. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number
- B. Gravity
- C. Evaporation
- D. A complete circuit

21. Name two things a plant needs for photosynthesis. [2]

- A. Light and carbon dioxide
- B. Gravity
- C. Evaporation
- D. A complete circuit

22. A battery-operated fan changes electrical energy mainly into what form? [2]

- A. Kinetic energy
- B. Gravity
- C. Evaporation
- D. A complete circuit

23. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- A. There is more friction
- B. Gravity
- C. Evaporation
- D. A complete circuit

24. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number
- B. Gravity
- C. Evaporation
- D. A complete circuit

25. Name two things a plant needs for photosynthesis. [2]

- A. Light and carbon dioxide
- B. Gravity
- C. Evaporation
- D. A complete circuit

26. A battery-operated fan changes electrical energy mainly into what form? [2]

- A. Kinetic energy
- B. Gravity
- C. Evaporation
- D. A complete circuit

27. A box is harder to push on a rough floor than a smooth floor. Explain why. [2]

- A. There is more friction
- B. Gravity
- C. Evaporation
- D. A complete circuit

28. What may happen to a food web if the number of producers decreases sharply? [2]

- A. Consumers may have less food and decrease in number
- B. Gravity
- C. Evaporation
- D. A complete circuit

29. Name two things a plant needs for photosynthesis. [2]

- A. Light and carbon dioxide
- B. Gravity
- C. Evaporation
- D. A complete circuit

30. A battery-operated fan changes electrical energy mainly into what form? [2]

- A. Kinetic energy
- B. Gravity
- C. Evaporation
- D. A complete circuit

Booklet B - Structured

10 structured questions, 4 marks each.

31. A box is harder to push on a rough floor than a smooth floor. Explain why. Explain your answer clearly. [4]

32. What may happen to a food web if the number of producers decreases sharply? Explain your answer clearly. [4]

33. Name two things a plant needs for photosynthesis. Explain your answer clearly. [4]

34. A battery-operated fan changes electrical energy mainly into what form? Explain your answer clearly. [4]

35. A box is harder to push on a rough floor than a smooth floor. Explain why. Explain your answer clearly. [4]

36. What may happen to a food web if the number of producers decreases sharply? Explain your answer clearly. [4]

37. Name two things a plant needs for photosynthesis. Explain your answer clearly. [4]

38. A battery-operated fan changes electrical energy mainly into what form? Explain your answer clearly. [4]

39. A box is harder to push on a rough floor than a smooth floor. Explain why. Explain your answer clearly. [4]

40. What may happen to a food web if the number of producers decreases sharply? Explain your answer clearly. [4]

Answer Key

Q	Section	Answer	Guidance
1	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
2	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
3	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
4	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
5	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
6	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
7	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.

Q	Section	Answer	Guidance
8	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
9	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
10	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
11	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
12	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
13	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
14	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
15	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
16	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
17	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
18	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
19	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
20	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
21	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
22	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
23	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
24	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
25	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
26	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.

Q	Section	Answer	Guidance
27	Booklet A - Multiple-choice	A	Rough surfaces produce greater friction opposing motion.
28	Booklet A - Multiple-choice	A	Energy enters most food webs through producers.
29	Booklet A - Multiple-choice	A	Plants also need water and chlorophyll to make food.
30	Booklet A - Multiple-choice	A	The electrical energy is converted into movement of the fan blades.
31	Booklet B - Structured	There is more friction	Rough surfaces produce greater friction opposing motion.
32	Booklet B - Structured	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
33	Booklet B - Structured	Light and carbon dioxide	Plants also need water and chlorophyll to make food.
34	Booklet B - Structured	Kinetic energy	The electrical energy is converted into movement of the fan blades.
35	Booklet B - Structured	There is more friction	Rough surfaces produce greater friction opposing motion.
36	Booklet B - Structured	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
37	Booklet B - Structured	Light and carbon dioxide	Plants also need water and chlorophyll to make food.
38	Booklet B - Structured	Kinetic energy	The electrical energy is converted into movement of the fan blades.
39	Booklet B - Structured	There is more friction	Rough surfaces produce greater friction opposing motion.
40	Booklet B - Structured	Consumers may have less food and decrease in number	Energy enters most food webs through producers.
