Life cycles of plants and animals

P3 · Cycles

1. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]

A. Incomplete metamorphosis

B. Gravity

C. Evaporation

D. A complete circuit

2. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]
Explain your answer clearly.

3. A young animal looks like the adult but is smaller. What type of life cycle is this? [4]
Explain your answer clearly.

4. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]

A. Incomplete metamorphosis

B. Gravity

C. Evaporation

D. A complete circuit

5. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]
Explain your answer clearly.

6. A young animal looks like the adult but is smaller. What type of life cycle is this? [4]
Explain your answer clearly.

7. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]

A. Incomplete metamorphosis

B. Gravity

C. Evaporation

D. A complete circuit

8. A young animal looks like the adult but is smaller. What type of life cycle is this? [2]
Explain your answer clearly.

Answer Key

Q	Section	Answer	Guidance
1	Life cycles of plants and animals	A	The young resembles the adult and grows by moulting.
2	Life cycles of plants and animals	Incomplete metamorphosis	The young resembles the adult and grows by moulting.
3	Life cycles of plants and animals	Incomplete metamorphosis	The young resembles the adult and grows by moulting.
4	Life cycles of plants and animals	A	The young resembles the adult and grows by moulting.
5	Life cycles of plants and animals	Incomplete metamorphosis	The young resembles the adult and grows by moulting.
6	Life cycles of plants and animals	Incomplete metamorphosis	The young resembles the adult and grows by moulting.
7	Life cycles of plants and animals	A	The young resembles the adult and grows by moulting.

Q	Section	Answer	Guidance
8	Life cycles of plants and animals	Incomplete metamorphosis	The young resembles the adult and grows by moulting.
