Electrical system

P5 · Systems

1. A bulb lights up only when there is a complete circuit. What does this show? [2]

A. Current flows only in a closed circuit

B. Gravity

C. Evaporation

D. A complete circuit

2. A bulb lights up only when there is a complete circuit. What does this show? Explain your answer clearly. [2]

3. A bulb lights up only when there is a complete circuit. What does this show? Explain your answer clearly. [4]

4. A bulb lights up only when there is a complete circuit. What does this show? [2]

A. Current flows only in a closed circuit

B. Gravity

C. Evaporation

D. A complete circuit

5. A bulb lights up only when there is a complete circuit. What does this show? Explain your answer clearly. [2]

6. A bulb lights up only when there is a complete circuit. What does this show? Explain your answer clearly. [4]

7. A bulb lights up only when there is a complete circuit. What does this show? [2]

- A. Current flows only in a closed circuit B. Gravity
C. Evaporation D. A complete circuit

8. A bulb lights up only when there is a complete circuit. What does this show? Explain your answer clearly. [2]

Answer Key

Q	Section	Answer	Guidance
1	Electrical system	A	An open circuit prevents current from flowing.
2	Electrical system	Current flows only in a closed circuit	An open circuit prevents current from flowing.
3	Electrical system	Current flows only in a closed circuit	An open circuit prevents current from flowing.
4	Electrical system	A	An open circuit prevents current from flowing.
5	Electrical system	Current flows only in a closed circuit	An open circuit prevents current from flowing.
6	Electrical system	Current flows only in a closed circuit	An open circuit prevents current from flowing.
7	Electrical system	A	An open circuit prevents current from flowing.

Q	Section	Answer	Guidance
8	Electrical system	Current flows only in a closed circuit	An open circuit prevents current from flowing.
